

CASE STUDY

Electrical Improver - Mitchell Tudor

MEET OUR APPRENTICE

Mitch is our Electrical Improver based at Langstone Park where he supports our client Envirotech FM. Mitch has been with Platinum since 2023, when he was TUPE transferred from the previous supplier on site.

Mitch has been able to get involved with a wide range of challenges during his time with Platinum, supported by the other site-based engineers and our onsite Site Manager and Site Administrator. Due to the nature of the site and the contract, Mitch has been involved in a number of tasks in addition to electrical works, which has allowed him to develop a wide range of skills in addition to his core subject.

STRUCTURE OF APPRENTICESHIP

An NVQ Level 3 Electrical Installation & Maintenance takes 4 years to complete. The City of Portsmouth College provides an online interactive portal where Mitch can submit examples of his work in accordance with the syllabus.

He is supported in this by both the college and his teammates, who provide on-site support and guidance, assisting Mitch in achieving his targets as needed.

Formal exams are facilitated by the college and undertaken either in-person or online, with assessors also visiting Langstone Park at regular intervals to assess Mitch's work onsite.

AT A GLANCE

Background

Mitch is currently undertaking a NVQ Level 3 in Electrical Installation via the City of Portsmouth College

He begins his 3rd year of study in September 2024
